YOUR SKIN.
YOUR GOALS.
YOUR TREATMENT.

The Clear + Brilliant® Treatment

Original Treatment

Goes deep beneath
the skin's surface

Perméa[®] Treatment

Treats closer to the
skin's surface

WHAT TO EXPECT

The Clear + Brilliant® Treatment is a gentle laser procedure backed by advanced technology

A Typical Clear + Brilliant® Treatment:

- **Requires about 30 to 45 minutes** for a session, which includes time for prep and consultation.*
- **May involve application of topical numbing cream** to your face prior to treatment in order to provide additional comfort. It must be removed prior to treatment, allow skin to dry
- There's **little to no downtime** after your treatment. You can get back to your routine the same day.

*Treatment times may vary.

**Based on a survey of 32 patients who received a Clear + Brilliant® treatment.

INDICATION

The Clear + Brilliant® system is a non-ablative laser for general skin resurfacing.

IMPORTANT SAFETY INFORMATION

The following contraindications are routine for many laser treatments and may also be associated with non-ablative Clear + Brilliant® laser system treatments. You may not be an appropriate candidate for a treatment if you:

- Have been diagnosed with or possibly have actinic keratosis, melasma, rosacea, or other significant skin conditions (e.g., skin cancer, active infections, cold sores, open wounds or a sore that has not or will not heal, rashes, burns, inflammation, eczema, psoriasis);
- Are predisposed to keloid formation or excessive scarring;
- Have a condition that may compromise the immune system, or your ability to fight infections, such as HIV, lupus, scleroderma, or infections in the blood stream;
- Have a known sensitivity to light or if you are taking any medications that may make your skin more sensitive to UV or artificial light;
- Are on oral/systemic steroids (e.g., prednisone, dexamethasone), which should be rigorously avoided prior to and throughout the course of treatment;
- Are using retinoids, which should be avoided for at least 2 weeks prior to and during treatment;
- Are undergoing isotretinoin acne treatment or taking drugs in a similar class;
- Have skin that is still recovering from a cosmetic procedure, such as a chemical or mechanical peel, or laser resurfacing; and
- Have had botulinum toxin injections, or dermal fillers (such as collagen or hyaluronic acid) within the past 2 weeks.
