"Since eCO Tone™ I've noticed my skin looks brighter and feels smoother. My sun damage has improved and I'm very satisfied, especially considering I only had one treatment. I'm scheduled for another eCO Tone session next month!"

Questions

What should I expect?

To ensure your comfort, your practitioner may opt to apply topical numbing cream to the treatment area approximately 45-60 minutes prior to the laser. Most patients describe the eCO Tone™ sensation as warm, tingly, and easily tolerated.

How long does the treatment take?

Sessions range from 10 to 20 minutes depending upon the area being treated.

Is there any downtime?

You will experience mild redness following your eCO Tone™ treatment and you will be able to resume normal activities immediately. Makeup and moisturizer may be applied based upon direction from your provider, typically within a few hours. The treated area may retain a pink, slightly tender look and feel for approximately 48 hours.

How many treatments will I need?

Depending upon your expectations, you may see results after a single eCO Tone treatment. Some skin conditions could require multiple visits. Discuss your aesthetic goals with your provider.

Is eCO Tone safe for all skin types?

Yes! All skin types can benefit from eCO Tone's rejuvenating effects. Consult your practitioner to determine the best treatment plan for you.

smoother skin
for a more youthful tone

what is eCO Tone?

eCO Tone™ is a quick, non-invasive laser treatment. Your provider will lightly resurface your skin, harnessing the body's natural healing properties to generate new, fresh tissue. eCO Tone improves the appearance of fine lines and unwanted pigment without the typical pain and long downtime patients expect from traditional treatments.

Ask your practitioner about the right treatment for you.

TONE

how the laser works

- By harnessing the ablative properties of Lutronic's eCO2 laser, eCO Tone delivers light energy to the skin
- Tissue is heated very quickly in miniscule doses, which minimizes the amount of residual warmth in the body – this results in fast, comfortable treatments with little downtime (1-2 days of red/pinkness and tenderness)
- Over the following several days you will notice fresher, clearer skin—eCO Toned skin
- eCO Tone can be experienced in multiple sessions for continually improving results & long term “prejuvenation”

what are the benefits?

eCO Tone can be applied to multiple areas of the body, including face, neck, chest, and hands.

eCO Tone can improve:

WRINKLES

RHYTIDES

FINE LINES

TEXTURAL IRREGULARITIES

PIGMENTED LESIONS

VASCULAR DYSCHROMIA

“My eCO Tone™ experience was quite pleasant with no discomfort and minimal downtime. I noticed some mild redness for a day or two, but I was able to apply make-up soon afterwards.

I recommend eCO Tone™ to my friends looking for a fast, easy, anti-aging treatment that yields awesome results.”
